

Are you experiencing:

Varicose Veins?

Joint Pain?

Tendon Pain?

Our Interventional Radiologist can help!

Our Interventional Radiologists have been performing procedures in many hospitals in and around Milwaukee for 52 years. They are now expanding and diversifying and will be bringing their expertise to MDI. With many years of experience combined, they provide state-of-the art treatments to help their patients live healthier, happier lives!

What is Interventional Radiology?

Interventional Radiology (IR) is a specialization that uses imaging guidance to perform minimally invasive procedures. Using the most advanced technology and techniques, Interventional Radiologists perform minimally invasive procedures to both diagnose and treat a variety of health conditions.

What are the benefits of Interventional Radiology?

Seeing an Interventional Radiologist compared to a traditional surgeon has many benefits including the following:

- Minimally invasive treatment
- Less expensive
- Less painful
- Less risk of infection or other complications
- Less down time

Call Milwaukee Radiologist Ltd at 414-914-9430 to schedule a consultation.
